$\langle \Psi | QIS \rangle 2017$

International Conference for
Young Quantum Information Scientists
October 3rd-6th 2017, Erlangen, Germany

The International Conference for “Young Quantum Information Scientists” (YQIS) is organized by young researchers for students and post-doctoral fellows and it will be supported by Wilhelm and Else Heraeus Foundation. YQIS topics are broadband and cover both the theoretical and experimental sides, ranging from the very foundations of quantum information to applied quantum systems.

This edition of YQIS will be supplemented by a session on the industrial relevance of quantum information science. There will be *an interactive tutorial session of quantum experience by IBM*.
